SELF INITIATED PROJECTS

- [Full Stack Website Hook & Grab](#) : Hook&Grab is a full-stack website developed by 5 friends of mine and me, for Odyssea's 2nd Blue & Circular Economy Hackathon. It offers a marketplace for fishermen for recycling old fishing equipment and prevent sea's pollution.Our implementation and the idea won the 1st place.
- [Full Stack Website for CS students](#) : I'm currently building a full-stack website to prepare students for Panhellenic exams in Informatics. It features quizzes made with JSON, flashcards, annotated textbook notes, and visualized algorithms to support engaging and efficient studying.
