SELF INITIATED PROJECTS

- [Full Stack Website Hook & Grab](#) : Hook&Grab is a full-stack website developed by 5 friends of mine and me, for Odyssea's 2nd Blue & Circular Economy Hackathon. It offers a marketplace for fishermen for recycling old fishing equipement and prevent sea's pollution.Our implementation and the idea won the 1st place.
- [Full Stack Website for CS students](#) : I built a full-stack website to prepare students for Panhellenic exams in Informatics. It features quizzes made with JSON, flashcards, annotated textbook notes, and visualized algorithms to support engaging and efficient studying.
- [Mobile App AthensGo](#) : AthensGo is an AI-powered mobile application that instantly generates perfect daily itineraries based on your interests, food allergies, and the need for 100% accessible routes. Our goal is to make exploring Athens easy, personalized, and fully inclusive for every single traveler.
- [Personal Portfolio :](#) I created a website showcasing my work experience, education, certifications, volunteer work to attract peers and other people in technology field.
